## WebSite Critique Questions

What was your first impression of this site?

1. How does this site organize the flow of information? (Do they have links on the left and text on the right? Some other scheme? No scheme?)
2. Does the site structure make sense or does it confuse you? Why?
3. Does the site graphics/layout/multimedia enhance the site or detract from it? Why?
4. How long did it take for the home page to load? Was the load time reasonable?
5. Was the text color and size readable? If a background color or image was used, did it enhance or detract from the site?
6. Did the site have a navigation bar or other navigation tool? Was the navigation well done?
7. Did the site have a color scheme or look and feel that was repeated on all the pages?
8. How does the site respond to smaller window sizes (responsive design)?
9. What does this site offer that was unusual or very well done?

## Answers

### Trader Joes

1. It feels maybe a bit busy? Or cluttered.
2. The links are in their own area, and the main page is filled with articles and other things.
3. It kind of confuses me, and makes it so I don't want to look around much. I feel like you have to look more at the page to understand how to get where you want to.
4. Detracts, it's too much, and makes me think that I'm on the wrong page.
5. It was very fast. And loaded almost instantly.

6.Its very readable, theres one image where its kind of hard to read, and the text on it blends into the color.

7.The navigation was its own little tab, leading to different links, and different other navigation.

8.It has a main color scheme of black with some red text.

9.Pretty well,

10.It seems like a very basic site, there isnt much that actually stands out about it.

## Snow Burd

1.It looks incredible and its so fun to school down and see what they have.

2.The flow of information is pretty well, as you go down it gives you a small summary, and then leads to the articles, and they dont fill up the whole page, they fill a small amount of the page, allowing for a good amount of information ,while not being cluttered.

3.It makes complete sense; it flows well, and tickles the brain in a good way.

4.They use multimedia to enhance the site, while making you more interested in the articles, and help you understand the articles a bit more.

5.Some parts loaded slower than others, like the pictures, but they still loaded at a reasonable amount of time.

6.The text color and size worked well, some of the sizes might be too small for someone who needs bigger text, but otherwise it works incredibly well.

7.They had a navigation took, and it was done incredibly well, it shows you how to get to every place.

8.Yes it does.

9.Its incredibly responsive

10.The responsive-ness. It makes it all look so good, and a lot better than a lot of other websites.
